

Security

Security is about managing risk

Edith Cowan University, Australia

Rockefeller Center, USA

Our Specialty: Peace of Mind

Only when you understand the risks you face in your business will you be able to protect yourself against potential physical and personal damage or financial loss.

One precaution you can take is to deploy electronic systems to help you manage your security requirements more effectively.

Finding the right company to provide the right security solution is a difficult task. You need to be confident that the partner you choose is reputable, reliable and capable. In other words, an industry leader with a proven track record.

TAC possesses all the above. Read on to discover who we are, what we do, and why we are the natural choice to solve all your security needs

This brochure will answer these questions.

Who are TAC?

Are they well established and reputable?

Who are their customers?

Do they provide solutions for businesses with problems similar to mine?

What type of solutions can they provide?

Are their systems reliable?

Will the systems meet my future needs?

Are security systems expensive?

About TAC

As a supplier of integrated systems for building automation, TAC leads the Building IT market, or information technology for buildings. TAC has established the concept of Open Systems for Building IT® on the market. This term articulates the company's goal of developing, producing and marketing products and open system solutions and services that improve the security and indoor environment and provide the building owner with added value in the form of a safer environment with lower operating costs.

TAC's headquarters is in Malmö, Sweden, with regional headquarters in Dallas, Texas, USA, and Perth, Australia. Employing more than 2,000 people, the company's operations serve the European, the Americas and Pacific markets through 250 subsidiaries and partners in 70 countries worldwide.

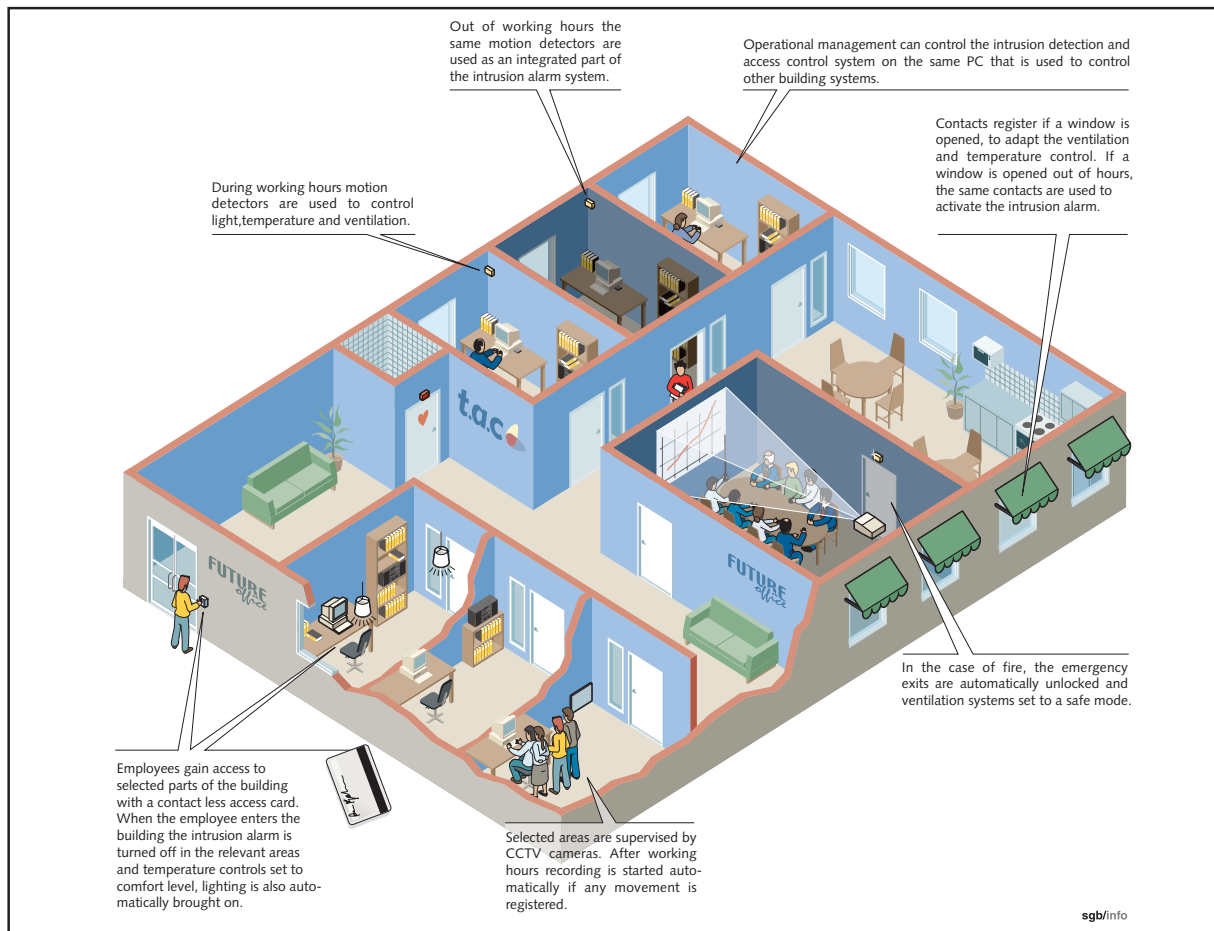

TAC is owned by Schneider Electric, the world's Power & Control specialist.

Reputation – TAC the Global Player

We are one of the largest control system companies in the world with offices or representatives in 70 countries.

For many of our competitors, control systems are just a secondary product line. At TAC, we are interested in nothing else. There's a big difference.

We are not distracted from our goals by slumps in the world battery market, European legislation on seatbelt design or the volatile nature of the aircraft construction industry. All companies everywhere have a need for our expertise. And that includes yours.

We Make Control Systems

Our security business is a fundamental part of who we are and what we do. It always has been and always will be. We don't search the globe looking for companies to buy simply because they have the word security in their name. That's not the way we do things at TAC.

Manufacturing, Supplying and Installing Security Systems for 20 Years

Security solutions form an essential part of our total approach to building control systems. The solutions we provide our customers integrate seamlessly with the wide diversity of applications that exist in modern buildings today.

TAC the Honest Player

Call us old fashioned, but we pride ourselves on our integrity and honesty. We don't believe in making a quick profit at the expense of our customers, our partners or our reputation.

Over 75 Years of Business Experience

TAC founded in 1925 with the creation in Sweden of Tour Argenturer. TAC introduces its first integrated security system in 1980.

In 1989, Control Systems International enters the security market with the purchase of Del Norte, a company that has been active in the industry since 1982. TAC and Dallas-based CSI merge in 2000. The new TAC company focuses on providing end users with world-class Building IT control solutions and services. It boasts customers on all seven continents, employs 2,000 employees, and operates in three major regions: Europe, the Americas and the Pacific.

An Easy Partner to Work With

We believe in giving you choice. TAC offers several different business arrangements tailored to suit your existing routines. Put simply, we adapt ourselves to your way of working, not the other way round.

You can work directly with a TAC branch office, our performance contracting group, or select one of our approved local partners.

Whichever you choose, you are assured the same high level of professionalism and industry expertise.

Long-term Relationships Built on Trust

We are proud of the fact that many of our customers have been with us for decades. TAC's honest and forthright approach to business has ensured that we are repeatedly reselected by many companies even when confronted by fierce competition from eager rivals.

Please contact us if you like further details and information about any of our past projects. Our customer base encompasses all industries and every type of building from private homes to large facilities owned by multinational companies.

National Physical Laboratory, United Kingdom

References

We are one of the few, perhaps the only, building controls company to have systems installed on all seven continents.
